30’10/2015

Dear Parents,

Our term 4 Science topic is ‘What’s it made of? Chemical science/materials’. To support students’ learning we will be having an incursion at school on the 9th November. Mad About Science is a hands on incursion where children explore chemical science.

“Colour changes, fizz and foam! Everything in our world is made up of chemicals. Explore chemical reactions, physical changes and more” - Mad About Science.

Parent helpers are not required for this incursion and the cost is covered by the excursion levy. If you have any queries please see your class teacher.

Kind regards,

Foundation teachers
