

YEAR 5&6

The art program over the year includes the exploration of both two and three-dimensional materials in the form of drawing, printing, painting, collage, modelling, construction and threads and textiles. Particular focus is given to the art elements of line, shape, colour, texture, tone and pattern. In the early years it is very important to provide children with a hands on, sensory experience. The students are given time to explore and experiment with different materials and techniques enabling 'discoveries' to be made along the way. All students are encouraged to push and challenge their materials and techniques as the process of making is just as important, if not more, than the outcome. In learning to respond to various aspects of the arts we will discuss and draw inspiration from many artists and great periods of art, both historical and contemporary, famous and those in our classroom. Student work is often displayed in and outside the Art room and can be viewed on the school website. All students are involved in the design and construction of both props and the backdrop for the school production. Students are encouraged to use their productive thinking talents and their problem solving skills across all areas of the program. Smocks are provided for all students to use during art lessons.
